PROFILE

Computer Science graduate with strong problem-solving abilities, and a passion for building impactful technology. Working in diverse teams has strengthened my intercultural awareness, collaboration, and communication skills. I excel in software development and cloud computing (Python, Java, AWS) while effectively bridging technical and non-technical teams. I approach problem-solving with adaptability, gathering insights to drive solutions and resolve conflicts. Looking to contribute my technical and interpersonal skills to innovative and fast-paced teams.

WORK EXPERIENCE

Co-founder

Jan 2025 – Present

Estate Lynx

Halifax, NS

- Collaborated with stakeholders to clarify MVP requirements, ensuring alignment with consumer insights.
- Developed a mobile App using **React Native**, **Expo**, **Tailwind**, and **TypeScript**, integrating real-time **WebSockets** for chat.
- Implemented a **REST API** with **Django** & **Django REST Framework** backed by a **PostgreSQL** database on **Azure**.
- Engaged with potential clients and partners to gather feedback, validate product ideas, and establish relationships.
- Led **UI/UX** design efforts to deliver a modern interface and intuitive user experience.

Software Development Intern

Jan 2024 – Aug 2024

Ashored Innovations

Halifax, NS

- Developed **Python** test scripts to thoroughly assess the functionality of MySQL database using **GraphQL** API.
- Integrated test scripts into the **CI/CD** pipeline using Terraform for **AWS CodeBuild** and **Github Actions**.
- Created Python Scripts for clients to efficiently manage users in **AWS Cognito** userpool groups.
- Created a **Flutter** WebApp, migrated functionality from a Flutter Android App and integrating backend.

Instructional Development

Jan 2023 – present

Dalhousie University

Halifax, NS

- Developed a website for TA training using **Next.js** and **Tailwind CSS** to improve accessibility and engagement. [\[View \]](#)
- Developed **R scripts** and **Power BI** queries to process data and generate charts and graphs for data analysis.
- Collaborated with Educational Developer and Instructors to create a TA training guide and improve student engagement.
- Built a Python **web-scraaper** to extract Dalhousie's academic timetable and generate instructor schedules in Excel.
- Created documentation, presentations, and videos to bridge communication gaps between students and professors.
- Developed workflows using **Power Automate**, reducing redundancy and saving instructors' time on routine tasks.

Software Developer Intern

May 2022 – Aug 2022

Protocase Inc.

Sydney, NS

- Developed a website with **Java**, **JavaScript** and **Bootstrap** for CAD uploads, 3D viewing, and pricing estimates.
- Presented project progress in sprint meetings, incorporating insights from senior colleagues.
- Collaborated with Marketing and Sales Directors to enhance applications based on user feedback.
- Designed a **REST API** to send CAD templates and receive price estimates from the Pricing Server.
- Created **UML diagrams** and **documentation** to support onboarding and project handover.
- Utilized **MySQL** to store client details with price estimates to generate leads for the sales team.

EDUCATION

Dalhousie University

Jan 2021 – Dec 2024

Bachelor of Computer Science

Halifax, NS

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, C, SQL

Frameworks/Libraries: React, React Native, Expo, Django, Flask, Flutter, Pydantic, Bootstrap, Tailwind

Developer Tools: Node.js, AWS (Lambda, AppSync, Rds), Terraform, MySQL, PostgreSQL, GitHub Actions, Wireshark, Git.

Concepts: Data Structures and Algorithms, REST APIs, SDLC, Design Patterns, Test Driven Development, CI/CD

Testing Tools: Pytest, JUnit

PERSONAL PROJECTS

Notes | *Python, Flask, React, SQLAlchemy, Bootstrap 5*

[\[View \]](#)

- Developed a Notes app with create, edit, delete features, and email-verified user authentication.

ReState Mobile App | *React Native, Expo, NativeWind CSS, AppWrite, Typescript*

[\[View \]](#)

- Developed a Real Estate App featuring property listings, search functionality, user authentication, and maps.
- Integrated Login and Registration features, incorporating user authentication through Email Verification.

Movie Reviews | *React JS, Java, Spring Boot, MongoDB, Bootstrap*

[\[View \]](#)

- Developed a scalable REST API with Spring Boot to handle reviews using GET/POST requests.

Exercise Tracker | *React, Express.js, Node.js, MongoDB*

[\[View \]](#)

- Built a React full-stack app for exercise management with CRUD functionality via Axios API.

ACADEMIC PROJECTS

Barter Android App | *Java, Android SDK, Firebase Realtime Database*

[\[View \]](#)

- Developed a **TDD**-based Android Barter app with Google Maps API for geolocation and RecyclerView for multiple pages.
- Tested with **JUnit**, **Espresso**, and lead a team of 6 using **Agile methodologies** for efficient development.

Multi-Client Chat Application | *Java, Socket Programming*

- Developed an app using **Java Sockets** and **Multi-Threading** to enable concurrent client handling and group chat.

HeliSound E-commerce Platform | *C#, ASP.NET, SQL Server, Bootstrap*

- Implemented role-based login, registration, and an Admin portal for managing users, products, and reports.
- Designed a **SQL Server** database and used **ASP.NET** GridView with Bootstrap for responsive data display.

Binary Translator | *C, x86-64 Assembly, GDB*

[\[View \]](#)

- Developed a binary translator in C that converts a simplified 16-bit instruction set into x86-64 assembly code.
- Implemented efficient instruction parsing and register mapping, ensuring accurate translation of complex operations.

Cache Simulator | *C, Memory Hierarchy*

[\[View \]](#)

- Designed and implemented a cache simulator in C, supporting fully associative, and set-associative caches.
- Simulated cache hits and misses, accurately tracking and reporting hit/miss count and hit-rate to analyze performance.

VOLUNTEER EXPERIENCE

Oversight Committee | Dalhousie U: advised on appointments, recruited candidates, evaluated DSU executives.

Council Chair Hiring Committee | DSU: conducted interviews and evaluated candidates for the DSU Council Chair.

CS Mentor | Dalhousie U : Provided guidance to 1st-year students on courses, study strategies, and resources.

INTERESTS/HOBBIES

Chess, Soccer, Reading, Traveling and Photography, Stock Market Analysis and Personal Investing, Cooking
